Good preventive maintenance helps
reduce the chance of a dryer fire

DON'T LET THIS HAPPEN TO YOUR LAUNDRY ROOM!!!

Top 10 Reasons For Dryer Fires

A PROPERLY TUNED UP DRYER:

- Decreases the chance of a dryer fire
- Reduces labor costs in your laundry room
- Reduces laundry room utility costs and energy consumption
- Reduces linen drying time
- Increases linen life
- Puts the **\$GREEN\$** back in your business
- Can help decrease insurance claims

- Poor exhaust installation
- Inadequate make-up air
- Lint build up around burner
- Clogged lint screens
- Exceeding maximum load capacity
- Drying of prohibited items/materials
- Flammable residual chemicals in linen being dried
- Component failure
- Operator error/over drying
- Clogged or restricted exhaust

Most dryer manufacturers recommend a dryer tune up every 4 years.
